

# AP Five-Year School Score Summary (2016)

Print / Download Options

This report shows five years of data at the school, state and global levels. On the first page, a graph illustrates the year-over-year change in the percentage of AP students with scores of 3 or higher, next to a table that provides the overall total exams, total unique students and both the number and percentage of AP students with one or more scores of 3 or higher. On subsequent pages, the report provides subject-specific summary data by year: total exams, total exams by score and mean score.

Data Updated Aug 2, 2016. Report Run Aug 11, 2016

Mondovi High School (501540)

% of Total AP Students with Scores 3+

AP Students with Scores 3+	1,295,051	1,354,800	1,442,136	1,515,264	1,581,522
% of Total AP Students with Scores 3+	61.5	60.9	61.3	60.7	60.3

"Success" on an AP Exam is defined as an exam score of 3 or higher, which represents the score point that research finds predictive of college success and college graduation. These findings have held consistent across the decades. One example of such a study comes from the National Center for Educational Accountability, which found that an AP Exam score, and a score of 3 or higher in particular, is a strong predictor of a student's ability to persist in college and earn a bachelor's degree.

The data in this report differs from other College Board reports, such as *The AP Report to the Nation*, which tracks exams taken by seniors throughout their high school career (cohort-based) and includes public school data only.
